Baher : Would you bring some paper?

Fares : Why do you want them? We are going to do online research!

Baher : ④ ....

Fares : ⑤ .... we need to take notes on important information.

3 Read the following and answer the questions:

When we taste food, our mouths tell us if the food is sweet, salty or spicy. But why do some people like some types of food and not others? There are many reasons. For example, some people don't like a type of food because they remember being ill after they ate it.

However, it is believed that you can change what you like. We often don't like unusual food because our brain doesn't understand it. So if you want to start liking food that is healthy, such as green vegetables, you should eat it more often. Then your brain will recognise it. You can also train your brain not to like something. For example, many people who stopped putting sugar on things found, after a time, that they didn't like sweet things.

So if you like sweets and don't like vegetables, you should train your brain to eat more healthily!

A. Answer the following questions:

1- Why do people often not like unusual food?

2- Why do you think people trained their brains not to like sugar?

B. Choose the correct answer from a, b, c or d:

3- Some people don't eat certain food because they ....

a ate it before and liked it
b ate it and didn't like it.
c didn't try it before.
d some people told them that it wasn't tasty.
